MPF Fund Platform helps with MPF planning

When we go shopping, most of us like to explore a few options first, comparing quality, price and other factors to make sure we get the best value for our money. Managing your MPF is similar -- you need to understand the different funds available and make thoughtful comparisons to choose wisely.

MPFA encourages employees to make good use of the [MPF Fund Platform](#), a comparison tool designed to help you select MPF funds. This platform provides information about the performance, risk levels and fees of all MPF funds over various periods, helping you make the investment choices that suit you best.

There are currently more than 300 MPF funds, each with separate investment performances and fees. Even among funds of the same type, the highest and lowest returns can vary significantly. The MPF Fund Platform provides official information on all MPF funds, such as investment performance, management fees, risk levels, expense ratios, fund components and fund size. You can view the information in table form, charts or side-by-side comparisons, simplifying the evaluation process.

If you have shortlisted several preferred funds but still can't decide, you can click the "My Selection" feature and add your chosen schemes and funds to a comparison list. The platform will clearly display relevant information side by side for easy review and comparison at a glance so as to choose the option that best suits your needs.

If you wish to further compare the overall performance of different funds, you can click the "Performance Charts" feature, which displays the 5- or 10-year performance data of funds. Additionally, you can browse the "Fund Information Table", which lists key information about all MPF funds in table form and provides filtering and sorting functions to help you quickly identify the most suitable options for you.

The platform also provides thoughtfully curated ranking charts, such as the "10 Highest 5-year Cumulative Return Funds" and the "10 Lowest Fund Expense Ratio Funds", allowing scheme members to quickly identify the best-performing funds.

We always encourage employees to review their MPF investment portfolios regularly to ensure they align with their personal investment goals and risk tolerance. The next time you choose MPF funds or review your MPF, make good use of the MPF Fund Platform. It's a powerful tool that helps you craft an investment strategy that truly fits your needs.
