Please visit [www.hkbea.com](http://www.hkbea.com) and click: Personal Banking/BEA Online/FAQs/Security Precautions to learn more about the latest security precautions.

## **7. Renminbi currency risk disclosure statement**

**RMB currency risk:** The value of the RMB is subject to the fluctuation of its exchange rate. Customers may suffer exchange rate loss due to such fluctuation if they convert RMB into other currencies (including Hong Kong Dollars).

The RMB is currently not completely freely convertible. Personal customers can be offered to conduct conversion of RMB using offshore rates and may occasionally not be able to do so fully or immediately, as this is subject to the RMB's position and market conditions at that time. Customers should understand and consider the possible impact on the liquidity of RMB funds. The exchange rate for the offshore RMB market in Hong Kong may be at a premium or discount when compared to the onshore market in the People's Republic of China, and there may be significant bid and offer spreads.

## 8. Risk disclosure relating to Renminbi securities trading

---

Customers who intend to trade RMB securities should note that the prices of RMB securities fluctuate, sometimes dramatically, as with any other securities. RMB securities prices may move up or down, and may become valueless. Losses may be incurred rather than profit made as a result of buying and selling securities. Before making any investment decision, customers should consider carefully and seek professional advice where necessary. Before making any investment, investors should refer to all relevant offering documents for detailed information including the risk factors. This material has not been reviewed by the Securities and Futures Commission in Hong Kong.
