

BEA (MPF) Master Trust Scheme Fund Fact Sheet 東亞(強積金)集成信託計劃基金概覽

As of 截至 30/09/2019

IMPORTANT :

- BEA (MPF) Master Trust Scheme offers different constituent funds (i) investing in one or more approved pooled investment funds and/or approved index-tracking funds which invest in equities or bonds; or (ii) making direct money market investments, each with different risk profile.
- BEA (MPF) Long Term Guaranteed Fund invests solely in an approved pooled investment fund in a form of insurance policy provided by Principal Insurance Company (Hong Kong) Limited. A guarantee is also given by Principal Insurance Company (Hong Kong) Limited. Your investment in this constituent fund, if any, is therefore subject to the credit risk of Principal Insurance Company (Hong Kong) Limited. Please refer to the Remark 6 in the last page of this Fund Fact Sheet and the Appendix 1 of the Explanatory Memorandum of the BEA (MPF) Master Trust Scheme for details of the credit risk, guarantee features and guarantee conditions of this constituent fund.
- If you are currently investing in BEA (MPF) Long Term Guaranteed Fund, a withdrawal of the accrued benefits on ground of terminal illness may affect your entitlement to the guarantee and you may lose your guarantee. For details, please check the scheme offering document or consult your trustee before making any such withdrawal.
- BEA (MPF) Conservative Fund does not provide any guarantee of the repayment of capital.
- You should consider your own risk tolerance level and financial circumstances before investing in the MPF default investment strategy ("DIS"). You should note that the BEA (MPF) Core Accumulation Fund and the BEA (MPF) Age 65 Plus Fund under BEA (MPF) Master Trust Scheme (collectively the "DIS Funds") may not be suitable for you, and there may be a risk mismatch between the DIS Funds and your risk profile (the resulting portfolio risk may be greater than your risk preference). You should seek financial and/or professional advice if you are in doubt as to whether the DIS is suitable for you, and make the investment decision most suitable for you taking into account your circumstances.
- You should note that the implementation of the DIS may have an impact on your MPF investments and benefits. You should consult with your trustee if you have doubts on how you are being affected.
- You should consider your own risk tolerance level and financial circumstances before making investment choices. When, in your selection of constituent funds, you are in doubt as to whether a certain constituent fund is suitable for you (including whether it is consistent with your investment objectives), you should seek financial and/or professional advice and choose the constituent fund(s) most suitable for you taking into account your circumstances.
- You should not invest based on this document alone. Investments inherently involve risk and the unit prices of the constituent funds may go down as well as up. Past performance stated in this document is not indicative of future performance. For further details including the product features, fees and charges, and the risk factors involved, please refer to the Explanatory Memorandum of the BEA (MPF) Master Trust Scheme.

Commentary 評論

- In the U.S., a slight reversal of growth expectations triggered a sell-off in U.S. Treasuries as well as a reversal of style leadership in equities, value oriented sectors and stocks staged a sharp rebound.
- Despite the latest weak macro data, markets have exhibited support largely due to an excess liquidity in the system.

- 美國方面，市場對增長的預期稍為轉變，觸發美國國債的拋售潮，以及股票市場的領漲類別變更，價值型導向的行業及股票強勁反彈。
- 儘管近期宏觀經濟數據疲弱，但充裕的流動性繼續是市場的重要支持。

- Data weakened with the signs of recovery in August not sustaining. Our provisional global manufacturing PMI index stayed dipped to 48.5, pulled down by a shocking reading in the US (ISM Mfg of 47.8). Breadth also weakened. The leading indicator for global industrial production dropped to a post-GFC low. Economic surprises went back into negative territory and global trade growth remained weak. However, financial conditions were at their easiest ever.
- Global Equities recorded broad-based gains. 35 out of the 40 markets we track ended in the green. The median local currency return for the month was 2%, which took the median YTD return to 11%.
- Fixed Income: Sovereign yields crashed again (26 out of our universe of 29 countries saw lower yields) on growth concerns, which pushed our global sovereign yield benchmark to an all-time low. Negative yielding debt ballooned to \$16.8 trillion. Bond funds delivered spectacular performance, led by sovereign bond funds.

- 8月份，經濟復甦的跡象無以為繼，最新的數據轉弱。我們的暫行全球製造業採購經理指數(「PMI」)繼續低見48.5，主要是受累於美國公佈的數字令人震驚(供應管理協會製造業指數(「ISM」)報47.8)，廣度亦收窄。環球工業生產的主要指標亦跌至全球金融危機(「GFC」)後的新低。經濟驚喜重回負區間，環球貿易增長依然疲弱，但金融環境為歷來最寬鬆。
- 全球股市普遍上揚，我們追蹤的40個市場中35個錄得升幅。本月按本地貨幣計算的回報中位數為2%，年初至今回報中位數為11%。
- 債券收益：受增長疑慮影響，主權孳息再次下滑(我們追蹤的29國主權債券中26國孳息下行)，我們的環球主權債券孳息基準亦因此降至歷來最低水平。負孳息債總值激增至16.8萬億美元，月內債券基金表現凌厲，當中以主權債券基金為首。

Commentary 評論

- The global bourses picked up strength again in September, reversing part of the losses of the August sell-off. The latest optimism came from the resumption of talks between the U.S. and China.
- In the U.S., a slight reversal of growth expectations triggered a sell-off in U.S. Treasuries as well as a reversal of style leadership in equities, value oriented sectors and stocks staged a sharp rebound.
- European equities recouped losses from August as European Central Bank announced rate cut and returned to bond purchase program to improve market liquidity. The energy sector rallied with the oil price spike due to drone strike in Saudi Arabia.
- China's onshore and offshore equity markets edged up slightly in September. IT sector outperformed on better than expected sales figures of smartphones. Mainland's independent power producers underperformed, weighed by the news of power tariff liberalization.
- While the economic data releases continue to reflect a weakening trend, capital markets have begun to stabilize largely discounting the negative sentiment.

- The fund risk indicator shows the annualised standard deviation based on the monthly rates of return of the fund over the past 3 years to the reporting date of this Fund Fact Sheet. 基金風險標記是以年度標準差表示，數據是根據截至該基金概覽匯報日，過往3年之按月回報率計算。
- Performance information of the constituent funds will be presented only if they have investment track records of not less than 6 months. 成分基金必須有最少6個月的投資往績紀錄，方會呈列業績表現資料。
- If the fund performance is less than 1 year, the calendar year return will be calculated from the launch date to that calendar year-end. 如基金表現少於1年，該基金曆年回報會以推出日至該曆年年底計算。
- The Fund Expense Ratio ("FER") is up to 31st March, 2019. It is not necessary to show a FER for a constituent fund where the period between the reporting date of the fund fact sheet and the inception date for the fund is less than 2 years. 基金開支比率截至2019年3月31日。如成分基金的基金概覽匯報日與基金的成立日期相隔不足兩年，則無須提供該基金的基金開支比率。
- The term "cash and others" should be used to denote cash at call, and operating items such as account payables and account receivables (where relevant). 「現金及其他」一詞應指通知現金，及類似應付款項和應收款項的營運項目（如適用）。
- This constituent fund is denominated in HKD only and not in RMB. Its investment in RMB deposits and RMB debt instruments will be subject to additional currency risks. In particular, RMB is currently not a freely convertible currency and is subject to foreign exchange controls and repatriation restrictions imposed by the Chinese government. Also, its investment in offshore RMB debt securities will be subject to additional market / liquidity risks. There is currently no active secondary market for offshore RMB debt securities and therefore, this constituent fund may need to hold investments until maturity date of such offshore RMB debt securities. In addition, although the issuance of offshore RMB debt securities has increased substantially in recent years, supply still lags the demand for offshore RMB debt securities. As a result, new issues of offshore RMB debt securities are usually oversubscribed and may be priced higher than and / or trade with a lower yield than equivalent onshore RMB debt securities. Currently, most of the offshore RMB debt securities available in the market may not meet the requirements under Schedule 1 to the Mandatory Provident Fund Schemes (General) Regulation and therefore, the offshore RMB debts securities available for investment by this constituent fund may be limited which may result in concentration of credit risk.
此成分基金只以港幣及非以人民幣計值，其於人民幣存款及人民幣債務投資工具的投資，將須承受額外的貨幣風險。尤其是，人民幣目前並非自由可兌換的貨幣，須受制於中國政府所施加的外匯管制及資金調限制。另外，其於離岸人民幣債務證券的投資將須承受額外市場 / 流動性風險。目前，由於離岸人民幣債務證券並無活躍的二級市場，此成分基金可能需要持有投資直至到期日。此外，儘管離岸人民幣債務證券的發行近年來已大幅增加，惟離岸人民幣債務證券的供應仍落後於需求。因此，新發行的離岸人民幣債務證券一般出現超額認購，而相比同等的非離岸人民幣債務證券，新發行的離岸人民幣債務證券訂價可能較高及 / 或以較低收益率買賣。目前，市場上可提供的離岸人民幣債務證券大多數可能不符合《強制性公積金計劃（一般）規例》附表1所載的規定，因此，此成分基金可投資的離岸人民幣債務證券可能有限，或會導致信貸風險集中。
- BEA (MPF) Long Term Guaranteed Fund invests solely in an approved pooled investment fund (the "Underlying Fund") in a form of insurance policy provided by Principal Insurance Company (Hong Kong) Limited (the "Guarantor"). The Guarantor offers the guarantee of capital and guaranteed rate of return for the Underlying Fund. The guaranteed rate of return for contributions made to the Underlying Fund after 30th September, 2004 was revised. The revised guarantee rate would be the "new applicable rate", which is currently set at 1% p.a. The guaranteed rate of return for contributions made to the Underlying Fund on or before 30th September, 2004 remains unchanged (5% p.a.). The guarantee of capital and the prescribed guarantee rate of return will only be offered if the contributions invested in the Underlying Fund (through the BEA (MPF) Long Term Guaranteed Fund) are withdrawn upon the occurrence of a "qualifying event", which is the receipt by the Guarantor of a valid claim of the accrued benefits of the member upon satisfying any of the following conditions: (a) Attainment of the normal retirement age or retirement at or after the early retirement age but before the normal retirement age; (b) Total incapacity; (c) Death; (d) Permanent departure from Hong Kong; (e) Claim of "small balance"; (f) Termination of the member's employment and the continuous period for which the member has been investing in the Underlying Fund (through the BEA (MPF) Long Term Guaranteed Fund) up to and including the last date of his employment ("qualifying period") is at least 36 complete months. (This only applies if the member is employed in a company participating in the Master Trust). Such qualifying period is determined at the scheme account level. The qualifying period may also be reset to zero if the member (or his personal representative) effects a redemption, switching out or withdrawal of investments from the BEA (MPF) Long Term Guaranteed Fund other than upon the occurrence of a qualifying event. For the avoidance of doubt, condition (f) does not apply to self-employed persons, personal account holders, Special Voluntary Contribution Account Members or Tax Deductible Voluntary Contribution Account holders; (g) Terminal illness. The conditions (a) to (e), and (g) apply to employee members, self-employed persons, personal account holders, Special Voluntary Contribution Account Members and Tax Deductible Voluntary Contribution Account holders. If a redemption, switching out or withdrawal of the units of the fund is effected other than the occurrence of a qualifying event as stated above, the guarantee will be affected. Special terms and conditions apply regarding how the guarantee operates. Please refer to the Appendix 1 of the Explanatory Memorandum for details of the credit risk, guarantee features and guarantee conditions of this constituent fund.
東亞（強積金）保證基金完全投資於由美國信安保險有限公司（「保證人」）以保險單形式提供保證的核准匯集投資基金（「基礎基金」）。保證人提供基礎基金的資本及回報率保證的擔保。在2004年9月30日之後，投資於基礎基金的供款所獲得的保證回報率已作出修訂。經修訂的保證率為「新適用率」，新適用率目前定為每年1%。於2004年9月30日或該日之前投入基礎基金的供款額所獲得的保證回報率維持不變（即每年5%）。本金和訂明的回報率保證只有在發生「合符規定事項」後，如提取（透過東亞（強積金）保證基金）投資於基礎基金的供款時方會提供。發生合符規定事項，是指在符合下述任何條件的情況下，保證人收到由成員就其在本集成信託中的累算權益提出的有效申索：（a）達到正常退休年齡，或在提早退休年齡退休，或在提早退休年齡後但在正常退休年齡前退休；（b）完全喪失行為能力；（c）死亡；（d）永久性離開香港；（e）申索「小額結算」；（f）成員終止受僱，而且成員持續（透過東亞（強積金）保證基金）投資於基礎基金的期間（直至並包括其受僱的最後1日）（「合符規定期間」）須至少為36個整月。（此要求只適用於經由參與本集成信託公司所僱用的成員。）該合符規定期間是按計劃賬戶的層面釐定。若成員（或其遺產代理人）在並非發生合符規定事項的情況下對東亞（強積金）保證基金進行贖回、轉換或提取基金單位，則該成員的合符規定期間也可能被重訂為零。為免生疑問，條件（f）並不適用於僱員人士、個人賬戶持有人、特別自願性供款賬戶成員或可扣稅自願性供款賬戶持有人；（g）罹患末期疾病。（a）至（e）、及（g）項條件適用於僱員成員、僱員人士、個人賬戶持有人、特別自願性供款賬戶成員及可扣稅自願性供款賬戶持有人。倘若在並非發生上述合符規定事項的情況下贖回、轉換或提取基金單位，保證將受影響。特定的條款及情況適用於保證運作。有關此項成分基金的信貸風險、保證特點及保證條件，請參閱說明書附件1。
- Fees and charges of MPF conservative fund can be deducted from either (i) the assets of the fund or (ii) members' account by way of unit deduction. BEA (MPF) Conservative Fund uses method (ii) and, therefore, unit prices, net asset value and fund performance quoted (except for the fund performance figures quoted in a fund fact sheet) do not reflect the impact of fees and charges.
強積金保守基金的收費可（一）透過扣除資產淨值收取；或（二）透過扣除成員賬戶中的單位收取。東亞（強積金）保守基金採用方式（二）收費，故所列之基金單位價格、資產淨值及基金表現（基金概覽所列的基金表現數字除外）並未反映收費的影響。
- Prescribed savings rate is a rate prescribed by the Mandatory Provident Fund Schemes Authority monthly. The prescribed savings rate is the simple average of the interest rates offered by the three note-issuing banks in Hong Kong on Hong Kong dollar savings account with deposit amount of \$120,000.
計明儲蓄利率指強制性公積金計劃管理局每月定期公佈的利率。該利率是三家香港的發鈔銀行港幣儲蓄戶口12萬元存款的利率水平之平均數。
- Default Investment Strategy ("DIS") is a ready-made investment arrangement mainly designed for those MPF scheme members who are not interested or do not wish to make an investment choice, and is also available as an investment choice itself, for members who find it suitable for their own circumstances. Members who do not wish to choose an investment option do not have to do so. For those members who do not make an investment choice, their future contributions and accrued benefits transferred from another MPF scheme will be invested in accordance with the DIS.
DIS is not a fund – it is a strategy that uses two constituent funds, i.e. the BEA (MPF) Core Accumulation Fund (the "Core Accumulation Fund") and BEA (MPF) Age 65 Plus Fund (the "Age 65 Plus Fund") to automatically reduce the risk exposure as the member approaches retirement age. Core Accumulation Fund will invest around 60% in higher risk assets (higher risk assets generally means equities or similar investments) whereas the Age 65 Plus Fund will invest around 20% in higher risk assets. Switching of the existing accrued benefits among Core Accumulation Fund and Age 65 Plus Fund will be automatically carried out each year on a member's birthday from the age of 50 to 64 and according to the allocation percentages as shown in the DIS de-risking table.
To invest in DIS, member's instruction must be an instruction to invest 100% of: (A) existing accrued benefits and/or (B) future contributions and accrued benefits transferred from another scheme in the DIS.
De-risking mechanism will not apply where the member chooses these constituent funds as standalone investments (rather than as part of the DIS). However, the funds with same name under DIS and non-DIS have the same unit prices.
For further details, including the product features, de-risking mechanism and table, fees and charges, investment rules and procedures, and the risk factors involved, please refer to the Explanatory Memorandum of the BEA (MPF) Master Trust Scheme.
預設投資策略是一項主要為無意或不希望作出投資選擇的強積金計劃成員而設的現成投資安排。成員若認為預設投資策略適合自身情況，亦可把預設投資策略作為投資選擇。成員如不想作出投資選擇，可無須這樣做。對於沒有作出投資選擇的成員，其未來供款及從其他強積金計劃轉移之累算權益將根據預設投資策略投資。
預設投資策略並非基金，而是一種透過使用2個成分基金，即東亞（強積金）核心累積基金（「核心累積基金」）及東亞（強積金）65歲後基金（「65歲後基金」），自動在成員逐步達到退休年齡的不同時候降低風險的策略。核心累積基金將其資產淨值中約60%投資於風險較高的投資產品（風險較高的投資產品一般指股票或類似的投資項目），而65歲後基金則將投資約20%於風險較高的投資產品。核心累積基金及65歲後基金之間的現有累算權益轉換將於成員50歲至64歲期間每年生日當日，根據預設投資策略風險降低表中載明之分配比率自動進行。
如投資於預設投資策略，成員的指示必須就以下部分作出全數投資：（A）現有累算權益和/或（B）未來供款及從其他計劃轉移之累算權益。
風險降低機制並不適用於主動選擇此等成分基金作為獨立投資（而非作為預設投資策略的一部份）的成員。然而，預設投資策略與非預設投資策略的同名基金，其單位價格相同。有關詳情，包括產品特點、風險降低機制及列表、收費、投資規則與程序，及所涉及的風險因素，請參閱東亞（強積金）集成信託計劃的說明書。

10 For the Core Accumulation Fund and Age 65 Plus Fund, a brief explanation should be provided for any material difference between their returns and that of the relevant recognised reference portfolio over any period of 1, 5, 10 years and since launch as constituent funds of the DIS. Material difference means a difference in annualised performance of a constituent fund of the DIS that exceeds (i) 2.5 percentage points either side of the annualised performance of the recognised reference portfolio where the reporting date of the fund fact sheet falls on or before 30th June, 2019; and (ii) 2.0 percentage points either side of the annualised performance of the recognised reference portfolio where the reporting date of the fund fact sheet falls after 30th June, 2019.

就核心累積基金及65歲後基金而言，如基金與相關的獲認可參考投資組合在1年期、5年期、10年期及自推出成為預設投資策略成分基金以來任何一段期間的回報有任何重大差異，須簡述差異理由。就此：(i) 如基金概覽的匯報日為2019年6月30日或之前，重大差異指某預設投資策略成分基金的年化表現，高於或低於獲認可參考投資組合年化表現，而兩者的差距超過2.5個百分點；及(ii) 如基金概覽的匯報日為2019年6月30日之後，重大差異指某預設投資策略成分基金的年化表現，高於或低於獲認可參考投資組合年化表現，而兩者的差距超過2.0個百分點。

11 Due to rounding, the total allocation may not add up to exactly 100%.

由於四捨五入關係，分佈的總數可能不等於100%。

BEA (MPF) Value Scheme Fund Fact Sheet 東亞（強積金）享惠計劃基金概覽

As of 截至 30/09/2019

IMPORTANT :

- BEA (MPF) Value Scheme offers different constituent funds (i) investing in one or more approved pooled investment funds or approved index-tracking funds which invest in equities or bonds; or (ii) making direct investments, each with different risk profile.
- BEA MPF Conservative Fund does not provide any guarantee of the repayment of capital.
- You should consider your own risk tolerance level and financial circumstances before investing in the MPF default investment strategy ("DIS"). You should note that the BEA Core Accumulation Fund and the BEA Age 65 Plus Fund under BEA (MPF) Value Scheme (collectively the "DIS Funds") may not be suitable for you, and there may be a risk mismatch between the DIS Funds and your risk profile (the resulting portfolio risk may be greater than your risk preference). You should seek financial and/or professional advice if you are in doubt as to whether the DIS is suitable for you, and make the investment decision most suitable for you taking into account your circumstances.
- You should note that the implementation of the DIS may have an impact on your MPF investments and benefits. You should consult with your trustee if you have doubts on how you are being affected.
- You should consider your own risk tolerance level and financial circumstances before making investment choices. When, in your selection of constituent funds, you are in doubt as to whether a certain constituent fund is suitable for you (including whether it is consistent with your investment objectives), you should seek financial and/or professional advice and choose the constituent fund(s) most suitable for you taking into account your circumstances.
- You should not invest based on this document alone. Investments inherently involve risk and the unit prices of the constituent funds may go down as well as up. Past performance stated in this document is not indicative of future performance. For further details including the product features, fees and charges, and the risk factors involved, please refer to the Explanatory Memorandum of the BEA (MPF) Value Scheme.

Commentary 評論

- The global bourses picked up strength again in September, reversing part of the losses of the August sell-off. The latest optimism came from the resumption of talks between the U.S. and China.
- In the U.S., a slight reversal of growth expectations triggered a sell-off in U.S. Treasuries as well as a reversal of style leadership in equities, value oriented sectors and stocks staged a sharp rebound.
- European equities recouped losses from August as European Central Bank announced rate cut and returned to bond purchase program to improve market liquidity. The energy sector rallied with the oil price spike due to drone strike in Saudi Arabia.
- China's onshore and offshore equity markets edged up slightly in September. IT sector outperformed on better than expected sales figures of smartphones. Mainland's independent power producers underperformed, weighed by the news of power tariff liberalization.
- While the economic data releases continue to reflect a weakening trend, capital markets have begun to stabilize largely discounting the negative sentiment.

- 環球市場於9月份再次走強，收復部分於8月份市場拋售所造成的損失。中美貿易談判恢復帶動近期市場樂觀情緒上升。
- 美國方面，市場對增長的預期稍為轉變，觸發美國國債的拋售潮，以及股票市場的領漲類別變更，價值型導向的行業及股票強勁反彈。
- 歐洲央行宣布減息並重返債券購買計劃以改善市場流動性，歐洲股票彌補自8月以來的損失。沙地阿拉伯的石油設施遭無人機襲擊，導致石油價格上漲，刺激能源股上升。
- 9月份中國在岸及離岸股市輕微上升。科技股表現突出，原因是智能電話的銷售勝過市場預期。內地的獨立電力生產商表現落後，主要受取消電力價格管制的消息拖累。
- 儘管經濟數據繼續反映趨勢走弱，但資本市場已開始回穩，某程度可抵消負面氣氛的影響。

- In the U.S., a slight reversal of growth expectations triggered a sell-off in U.S. Treasuries as well as a reversal of style leadership in equities, value oriented sectors and stocks staged a sharp rebound.
- European equities recouped losses from August as European Central Bank announced rate cut and returned to bond purchase program to improve market liquidity. The energy sector rallied with the oil price spike due to drone strike in Saudi Arabia.
- China's onshore and offshore equity markets edged up slightly in September. IT sector outperformed on better than expected sales figures of smartphones. Mainland's independent power producers underperformed, weighed by the news of power tariff liberalization.

Commentary 評論

- The global bourses picked up strength again in September, reversing part of the losses of the August sell-off. The latest optimism came from the resumption of talks between the U.S. and China.
- In the U.S., a slight reversal of growth expectations triggered a sell-off in U.S. Treasuries as well as a reversal of style leadership in equities, value oriented sectors and stocks staged a sharp rebound.
- European equities recouped losses from August as European Central Bank announced rate cut and returned to bond purchase program to improve market liquidity. The energy sector rallied with the oil price spike due to drone strike in Saudi Arabia.
- China's onshore and offshore equity markets edged up slightly in September. IT sector outperformed on better than expected sales figures of smartphones. Mainland's independent power producers underperformed, weighed by the news of power tariff liberalization.
- While the economic data releases continue to reflect a weakening trend, capital markets have begun to stabilize largely discounting the negative sentiment.

- The fund risk indicator shows the annualised standard deviation based on the monthly rates of return of the fund over the past 3 years to the reporting date of this Fund Fact Sheet.
基金風險標記是以年度標準差表示，數據是根據截至該基金概覽匯報日，過往3年之按月回報率計算。
- Performance information of the constituent funds will be presented only if they have investment track records of not less than 6 months.
成分基金必須有最少6個月的投資往績紀錄，方會呈列業績表現資料。
- If the fund performance is less than 1 year, the calendar year return will be calculated from the launch date to that calendar year-end.
如基金表現少於1年，該基金曆年回報會以推出日至該曆年年底計算。
- The Fund Expense Ratio ("FER") is up to 31st March, 2019. It is not necessary to show a FER for a constituent fund where the period between the reporting date of the fund fact sheet and the inception date for the fund is less than 2 years.
基金開支比率截至2019年3月31日。如成分基金的基金概覽匯報日與基金的成立日期相隔不足兩年，則無須提供該基金的基金開支比率。
- The term "cash and others" should be used to denote cash at call, and operating items such as account payables and account receivables (where relevant).
「現金及其他」一詞應指通知現金，及類似應付款項和應收款項的營運項目（如適用）。
- Fees and charges of MPF Conservative Fund can be deducted from either (i) the assets of the fund or (ii) members' account by way of unit deduction. BEA MPF Conservative Fund uses method (ii) and, therefore, unit prices, net asset value and fund performance quoted (except for the fund performance figures quoted in a fund fact sheet) do not reflect the impact of fees and charges.
強積金保守基金的收費可（一）透過扣除資產淨值收取；或（二）透過扣除成員賬戶中的單位收取。東亞強積金保守基金採用方式（二）收費，故所列之基金單位價格、資產淨值及基金表現（基金概覽所列的基金表現數字除外）並未反映收費的影響。
- Prescribed savings rate is a rate prescribed by the Mandatory Provident Fund Schemes Authority monthly. The prescribed savings rate is the simple average of the interest rates offered by the three note-issuing banks in Hong Kong on Hong Kong dollar savings account with deposit amount of \$120,000.
訂明儲蓄利率指強制性公積金計劃管理局每月定期公佈的利率。該利率是三家香港的發鈔銀行港幣儲蓄戶口12萬元存款的利率水平之平均數。
- Default Investment Strategy ("DIS") is a ready-made investment arrangement mainly designed for those MPF scheme members who are not interested or do not wish to make an investment choice, and is also available as an investment choice itself, for members who find it suitable for their own circumstances. Members who do not wish to choose an investment option do not have to do so. For those members who do not make an investment choice, their future contributions and accrued benefits transferred from another MPF scheme will be invested in accordance with the DIS.
DIS is not a fund - it is a strategy that uses two constituent funds, i.e. the BEA Core Accumulation Fund (the "Core Accumulation Fund") and BEA Age 65 Plus Fund (the "Age 65 Plus Fund") to automatically reduce the risk exposure as the member approaches retirement age. Core Accumulation Fund will invest around 60% in higher risk assets (higher risk assets generally means equities or similar investments) whereas the Age 65 Plus Fund will invest around 20% in higher risk assets. Switching of the existing accrued benefits among Core Accumulation Fund and Age 65 Plus Fund will be automatically carried out each year on a member's birthday from the age of 50 to 64 and according to the allocation percentages as shown in the DIS de-risking table.
To invest in DIS, member's instruction must be an instruction to invest 100% of: (A) existing accrued benefits and/or (B) future contributions and accrued benefits transferred from another scheme in the DIS.
De-risking mechanism will not apply where the member chooses these constituent funds as standalone investments (rather than as part of the DIS). However, the funds with same name under DIS and non-DIS have the same unit prices.
For further details, including the product features, de-risking mechanism and table, fees and charges, investment rules and procedures, and the risk factors involved, please refer to the Explanatory Memorandum of the BEA (MPF) Value Scheme.
預設投資策略是一項主要為無意或不希望作出投資選擇的強積金計劃成員而設的現成投資安排。成員若認為預設投資策略適合自身情況，亦可把預設投資策略作為投資選擇。成員如不想作出投資選擇，可無須這樣做。對於沒有作出投資選擇的成員，其未來供款及從其他強積金計劃轉移之累算權益將根據預設投資策略投資。
預設投資策略並非基金，而是一種透過使用2個成分基金，即東亞核心累積基金（「核心累積基金」）及東亞65歲後基金（「65歲後基金」），自動在成員逐步達到退休年齡的不同時候降低風險的策略。核心累積基金將其資產淨值中約60%投資於風險較高的投資產品（風險較高的投資產品一般指股票或類似的投資項目），而65歲後基金則將投資約20%於風險較高的投資產品。核心累積基金及65歲後基金之間的現有累算權益轉換將於成員50歲至64歲期間每年生日當日，根據預設投資策略風險降低表中載明之分配比率自動進行。
如投資於預設投資策略，成員的指示必須就以下部分作出全數投資：(A) 現有累算權益和/或 (B) 未來供款及從其他計劃轉移之累算權益。
風險降低機制並不適用於主動選擇此等成分基金作為獨立投資（而非作為預設投資策略的一部份）的成員。然而，預設投資策略與非預設投資策略的同名基金，其單位價格相同。有關詳情，包括產品特點、風險降低機制及列表、收費、投資規則與程序，及所涉及的風險因素，請參閱東亞（強積金）享惠計劃的說明書。
- For the Core Accumulation Fund and Age 65 Plus Fund, a brief explanation should be provided for any material difference between their returns and that of the relevant recognised reference portfolio over any period of 1, 5, 10 years and since launch as constituent funds of the DIS. Material difference means a difference in annualised performance of a constituent fund of the DIS that exceeds (i) 2.5 percentage points either side of the annualised performance of the recognised reference portfolio where the reporting date of the fund fact sheet falls on or before 30th June, 2019; and (ii) 2.0 percentage points either side of the annualised performance of the recognised reference portfolio where the reporting date of the fund fact sheet falls after 30th June, 2019.
就核心累積基金及65歲後基金而言，如基金與相關的獲認可參考投資組合在1年期、5年期、10年期及自推出成為預設投資策略成分基金以來任何一段期間的回報有任何重大差異，須簡述差異理由。就此：(i) 如基金概覽的匯報日為2019年6月30日或之前，重大差異指某預設投資策略成分基金的年率化表現，高於或低於獲認可參考投資組合年率化表現，而兩者的差距超過2.5個百分點；及(ii) 如基金概覽的匯報日為2019年6月30日之後，重大差異指某預設投資策略成分基金的年率化表現，高於或低於獲認可參考投資組合年率化表現，而兩者的差距超過2.0個百分點。
- Due to rounding, the total allocation may not add up to exactly 100%.
由於四捨五入關係，分佈的總數可能不等於100%。

BEA (MPF) Industry Scheme Fund Fact Sheet 東亞（強積金）行業計劃基金概覽

As of 截至 30/09/2019

IMPORTANT :

- BEA (MPF) Industry Scheme offers different constituent funds (i) investing in two or more approved pooled investment funds and/or approved index-tracking funds which invest in equities or bonds; or (ii) making direct money market investments, each with different risk profile.
- BEA (Industry Scheme) MPF Conservative Fund does not provide any guarantee of the repayment of capital.
- You should consider your own risk tolerance level and financial circumstances before investing in the MPF default investment strategy ("DIS"). You should note that the BEA (Industry Scheme) Core Accumulation Fund and the BEA (Industry Scheme) Age 65 Plus Fund under BEA (MPF) Industry Scheme (collectively the "DIS Funds") may not be suitable for you, and there may be a risk mismatch between the DIS Funds and your risk profile (the resulting portfolio risk may be greater than your risk preference). You should seek financial and/or professional advice if you are in doubt as to whether the DIS is suitable for you, and make the investment decision most suitable for you taking into account your circumstances.
- You should note that the implementation of the DIS may have an impact on your MPF investments and benefits. You should consult with your trustee if you have doubts on how you are being affected.
- You should consider your own risk tolerance level and financial circumstances before making investment choices. When, in your selection of constituent funds, you are in doubt as to whether a certain constituent fund is suitable for you (including whether it is consistent with your investment objectives), you should seek financial and/or professional advice and choose the constituent fund(s) most suitable for you taking into account your circumstances.
- You should not invest based on this document alone. Investments inherently involve risk and the unit prices of the constituent funds may go down as well as up. Past performance stated in this document is not indicative of future performance. For further details including the product features, fees and charges, and the risk factors involved, please refer to the Explanatory Memorandum of the BEA (MPF) Industry Scheme.

- The global bourses picked up strength again in September, reversing part of the losses of the August sell-off. The latest optimism came from the resumption of talks between the U.S. and China.
- In the U.S., a slight reversal of growth expectations triggered a sell-off in U.S. Treasuries as well as a reversal of style leadership in equities, value oriented sectors and stocks staged a sharp rebound.
- European equities recouped losses from August as European Central Bank announced rate cut and returned to bond purchase program to improve market liquidity. The energy sector rallied with the oil price spike due to drone strike in Saudi Arabia.
- China's onshore and offshore equity markets edged up slightly in September. IT sector outperformed on better than expected sales figures of smartphones. Mainland's independent power producers underperformed, weighed by the news of power tariff liberalization.
- While the economic data releases continue to reflect a weakening trend, capital markets have begun to stabilize largely discounting the negative sentiment.

- The fund risk indicator shows the annualised standard deviation based on the monthly rates of return of the fund over the past 3 years to the reporting date of this Fund Fact Sheet. 基金風險標記是以年度標準差表示，數據是根據截至該基金概覽匯報日，過往3年之按月回報率計算。
- Performance information of the constituent funds will be presented only if they have investment track records of not less than 6 months. 成分基金必須有最少6個月的投資往績紀錄，方會呈列業績表現資料。
- If the fund performance is less than 1 year, the calendar year return will be calculated from the launch date to that calendar year-end. 如基金表現少於1年，該基金曆年回報會以推出日至該曆年年底計算。
- The Fund Expense Ratio ("FER") is up to 31st March, 2019. It is not necessary to show a FER for a constituent fund where the period between the reporting date of the fund fact sheet and the inception date for the fund is less than 2 years. 基金開支比率截至2019年3月31日。如成分基金的基金概覽匯報日與基金的成立日期相隔不足兩年，則無須提供該基金的基金開支比率。
- The term "cash and others" should be used to denote cash at call, and operating items such as account payables and account receivables (where relevant). 「現金及其他」一詞應指通知現金，及類似應付款項和應收款項的營運項目（如適用）。
- This constituent fund is denominated in HKD only and not in RMB. Its investment in RMB deposits and RMB debt instruments will be subject to additional currency risks. In particular, RMB is currently not a freely convertible currency and is subject to foreign exchange controls and repatriation restrictions imposed by the Chinese government. Also, its investment in offshore RMB debt securities will be subject to additional market / liquidity risks. There is currently no active secondary market for offshore RMB debt securities and therefore, this constituent fund may need to hold investments until maturity date of such offshore RMB debt securities. In addition, although the issuance of offshore RMB debt securities has increased substantially in recent years, supply still lags the demand for offshore RMB debt securities. As a result, new issues of offshore RMB debt securities are usually oversubscribed and may be priced higher than and / or trade with a lower yield than equivalent onshore RMB debt securities. Currently, most of the offshore RMB debt securities available in the market may not meet the requirements under Schedule 1 to the Mandatory Provident Fund Schemes (General) Regulation and therefore, the offshore RMB debt securities available for investment by this constituent fund may be limited which may result in concentration of credit risk. 此成分基金只以港幣及非以人民幣計值，其於人民幣存款及人民幣債務投資工具的投資，將須承受額外的貨幣風險。尤其是，人民幣目前並非自由可兌換的貨幣，須受制於中國政府所施加的外匯管制及資金調回限制。另外，其於離岸人民幣債務證券的投資將須承受額外市場 / 流動性風險。目前，由於離岸人民幣債務證券並無活躍的二級市場，此成分基金可能需要持有投資直至到期日。此外，儘管離岸人民幣債務證券的發行近年來已大幅增加，惟離岸人民幣債務證券的供應仍落後於需求。因此，新發行的離岸人民幣債務證券一般出現起碼認購，而相比同等的非離岸人民幣債務證券，新發行的離岸人民幣債務證券訂價可能較高及 / 或以較低收益率買賣。目前，市場上可提供的離岸人民幣債務證券大多數可能不符合《強制性公積金計劃（一般）規例》附表1所載的規定，因此，此成分基金可投資的離岸人民幣債務證券可能有限，或會導致信貸風險集中。
- Fees and charges of MPF conservative fund can be deducted from either (i) the assets of the fund or (ii) members' account by way of unit deduction. BEA (Industry Scheme) MPF Conservative Fund uses method (ii) and, therefore, unit prices, net asset value and fund performance quoted (except for the fund performance figures quoted in a fund fact sheet) do not reflect the impact of fees and charges. 強積金保守基金的收費可（一）透過扣除資產淨值收取；或（二）透過扣除成員賬戶中的單位收取。東亞（行業計劃）強積金保守基金採用方式（二）收費，故所列之基金單位價格、資產淨值及基金表現（基金概覽所列的基金表現數字除外）並未反映收費的影響。
- Prescribed savings rate is a rate prescribed by the Mandatory Provident Fund Schemes Authority monthly. The prescribed savings rate is the simple average of the interest rates offered by the three note-issuing banks in Hong Kong on Hong Kong dollar savings account with deposit amount of \$120,000. 訂明儲蓄利率指強制性公積金計劃管理局每月定期公佈的利率。該利率是三家香港的發鈔銀行港幣儲蓄戶口12萬元存款的利率水平之平均數。
- Default Investment Strategy ("DIS") is a ready-made investment arrangement mainly designed for those MPF scheme members who are not interested or do not wish to make an investment choice, and is also available as an investment choice itself, for members who find it suitable for their own circumstances. Members who do not wish to choose an investment option do not have to do so. For those members who do not make an investment choice, their future contributions and accrued benefits transferred from another MPF scheme will be invested in accordance with the DIS. DIS is not a fund - it is a strategy that uses two constituent funds, i.e. the BEA (Industry Scheme) Core Accumulation Fund (the "Core Accumulation Fund") and BEA (Industry Scheme) Age 65 Plus Fund (the "Age 65 Plus Fund") to automatically reduce the risk exposure as the member approaches retirement age. Core Accumulation Fund will invest around 60% in higher risk assets (higher risk assets generally means equities or similar investments) whereas the Age 65 Plus Fund will invest around 20% in higher risk assets. Switching of the existing accrued benefits among Core Accumulation Fund and Age 65 Plus Fund will be automatically carried out each year on a member's birthday from the age of 50 to 64 and according to the allocation percentages as shown in the DIS de-risking table. To invest in DIS, member's instruction must be an instruction to invest 100% of: (A) existing accrued benefits and/or (B) future contributions and accrued benefits transferred from another scheme in the DIS. De-risking mechanism will not apply where the member chooses these constituent funds as standalone investments (rather than as part of the DIS). However, the funds with same name under DIS and non-DIS have the same unit prices. For further details, including the product features, de-risking mechanism and table, fees and charges, investment rules and procedures, and the risk factors involved, please refer to the Explanatory Memorandum of the BEA (MPF) Industry Scheme. 預設投資策略是一項主要為無意或不希望作出投資選擇的強積金計劃成員而設的現成投資安排。成員若認為預設投資策略適合自身情況，亦可把預設投資策略作為投資選擇。成員如不想作出投資選擇，可無須這樣做。對於沒有作出投資選擇的成員，其未來供款及從其他強積金計劃轉移之累積權益將根據預設投資策略投資。預設投資策略並非基金，而是一種透過使用2個成分基金，即東亞（行業計劃）核心累積基金（「核心累積基金」）及東亞（行業計劃）65歲後基金（「65歲後基金」），自動在成員逐步達到退休年齡的不同時候降低風險的策略。核心累積基金將其資產淨值中約60%投資於風險較高的投資產品（風險較高的投資產品一般指股票或類似的投資項目），而65歲後基金則將投資約20%於風險較高的投資產品。核心累積基金及65歲後基金之間的現有累積權益轉換將於成員50歲至64歲期間每年生日當日，根據預設投資策略風險降低表中載明之分配比率自動進行。如投資於預設投資策略，成員的指示必須就以下部分作出全數投資：(A) 現有累積權益和/或 (B) 未來供款及從其他計劃轉移之累積權益。風險降低機制並不適用於主動選擇此等成分基金作為獨立投資（而非作為預設投資策略的一部份）的成員。然而，預設投資策略與非預設投資策略的同名基金，其單位價格相同。有關詳情，包括產品特點、風險降低機制及列表、收費、投資規則與程序，及所涉及的風險因素，請參閱東亞（強積金）行業計劃的說明書。
- For the Core Accumulation Fund and Age 65 Plus Fund, a brief explanation should be provided for any material difference between their returns and that of the relevant recognised reference portfolio over any period of 1, 5, 10 years and since launch as constituent funds of the DIS. Material difference means a difference in annualised performance of a constituent fund of the DIS that exceeds (i) 2.5 percentage points either side of the annualised performance of the recognised reference portfolio where the reporting date of the fund fact sheet falls on or before 30th June, 2019; and (ii) 2.0 percentage points either side of the annualised performance of the recognised reference portfolio where the reporting date of the fund fact sheet falls after 30th June, 2019. 就核心累積基金及65歲後基金而言，如基金與相關的獲認可參考投資組合在1年期、5年期、10年期及自推出成為預設投資策略成分基金以來任何一段期間的回報有任何重大差異，須簡述差異理由。就此：(i) 如基金概覽的匯報日為2019年6月30日或之前，重大差異指某預設投資策略成分基金的年化表現，高於或低於獲認可參考投資組合年化表現，而兩者的差距超過2.5個百分點；及(ii) 如基金概覽的匯報日為2019年6月30日之後，重大差異指某預設投資策略成分基金的年化表現，高於或低於獲認可參考投資組合年化表現，而兩者的差距超過2.0個百分點。
