

# BEA (MPF) Value Scheme Fund Fact Sheet 東亞(強積金)享惠計劃基金概覽

# As of 截至 30/6/2021

### **IMPORTANT :**

- BEA (MPF) Value Scheme offers different constituent funds (i) investing in one or more approved pooled investment funds or approved index-tracking funds which invest in equities or bonds; or (ii) making direct investments. Each constituent fund has a different risk profile.
- The BEA MPF Conservative Fund does not provide any guarantee of the repayment of capital.
- You should consider your own risk tolerance level and financial circumstances before investing in the MPF default investment strategy ("DIS"). You should note that the BEA Core Accumulation Fund and the BEA Age 65 Plus Fund under BEA (MPF) Value Scheme (collectively the "DIS Funds") may not be suitable for you, and there may be a risk mismatch between the DIS Funds and your risk profile (the resulting portfolio risk may be greater than your risk preference). You should seek financial and/or professional advice if you are in doubt as to whether the DIS is suitable for you, and make the investment decision most suitable for you taking into account your circumstances.
- You should note that the implementation of the DIS may have an impact on your MPF investments and accrued benefits. You should consult with the trustee if you have doubts on how you are being affected.
- Investment involves risks. You should consider your own risk tolerance level and financial circumstances before making any investment choices. In your selection of constituent funds, if you are in doubt as to whether a certain constituent fund is suitable for you (including whether it is consistent with your investment objectives), you should seek financial and/or professional advice and choose the constituent fund(s) most suitable for you taking into account your circumstances.
- You should not invest based on this document alone. Investments inherently involve risk and the unit prices of the constituent funds may go down as well as up. Past performance stated in this document is not indicative of future performance. For further details including the product features, fees and charges, and the risk factors involved, please refer to the MPF Scheme Brochure of the BEA (MPF) Value Scheme.
- Important If you are in doubt about the meaning or effect of the contents of the MPF Scheme Brochure and this document, you should seek independent professional advice.

- •美股6月份表現跑贏主要成熟市場,MSCI美國指數月內微升2.8%,上半年美 股累升近15%。美國第二季GDP增長強勁反映經濟復甦步伐理想。
- 在貨幣政策方面,美國聯儲局於6月份議息會議後,釋放「鷹派訊號」,預示於 2023年前有機會開始加息,但實則時間表則要視乎經濟表現及疫情發展。
- 自美聯儲「放鷹」後,美市曾一度下挫,但於數天後即收復失地,科技、非必 需消費品和能源股走強。
- 歐洲股市6月份升幅輕微,上半年錄得12%升幅。歐洲議會通過疫苗接種護 照,放寬歐洲旅遊,歐元區失業率進一步下降及製造業指數持續上升。大型 企業及健康護理股份於月內跑贏大市。

- Asian equities performed well in general for the first half of the year with Vietnam, Singapore, Taiwan and Korea being the outperformers, while other countries are still affected by the subsequent outbreaks of COVID and the low vaccination rate which might hinder their economic recover
- The economic recovery in Asia is quite stable overall, but policy risk, vaccination rate and the development of COVID might impact the pace of recovery, our investment team will manage the portfolio in a more active and cautious way

### Commentary 評論

- Offshore and onshore indices were slightly down, the market sentiment has held up well ahead of the CCP's 100th anniversary. Growth stocks being the outperformer due to the lowering of U.S. treasury yield. Automobiles outperformed on better than expected electric vehicle sales, while properties and materials underperformed.
- The economic figures of China in the first half of the year reflected the recovery was slightly slowing down, coupling with the tightening measures of the Chinese government and the capital chain issues of onshore property developers dragged the market sentiment.
- Taiwan stock market outperformed other major markets in the first half of the year due to the more contained COVID situation and the shortage of chips worldwide, capital has been flowing to the market to seek for opportunities. However, Taiwan experienced an outbreak of COVID in May which investors worried about its negative impact on economic growth and stock market's performance, capital outflow was seen. The GDP growth in the second quarter recorded 7.5% YOY, we anticipate that once the COVID is under control again, the economy will continue to benefit from domestic consumption, the strong demand of smart phone and chips from rest of the world

Economic recovery momentum continued as reflected by the strong GDP growth in the second warter On monetary policy side, the U.S. Fed released a hawkish signal following the FOMC meeting in June and implied the rate hike will start before 2023, the exact timing will depend on the economic performance and the COVID situation. The U.S. equity market once retreated following the release of hawkish signal and rebounded soon after with technology, discretionary consumption and energy being the outperformers.

- uscreuonary consumption and energy being the outperformers. European stocks was slightly up in June and it was closed to 12% rise in the first half of the year. European Parliament approved vaccine passport to ease travel in Europea. Unemployment rate in Eurozone trended down and PMI expanded further. Large cap and Health Care sector led performance during the month. The economic figures of China in the first half of the year reflected the recovery was slightly slowing down, coupling with the tightening measures of the Chinese government and the capital chain issues of onshore property developers dragged the market sentiment.

#### Commentary 評論

- The U.S. equities outperformed among developed markets as MSCI USA Index gained 2.8% in June and ended 2021 first half with a return of nearly 15%. Economic recovery momentum continued as reflected by the strong GDP growth in the second

- with a return of nearly 15%. Economic recovery momentum continued as reflected by the strong GDP growth in the second quarter.
  On monetary policy side, the U.S. Fed released a hawkish signal following the FOMC meeting in June and implied the rate hike will start before 2023, the exact timing will depend on the economic performance and the COVID situation.
  The U.S. equity market once retreated following the release of hawkish signal and rebounded soon after with technology, discretionary consumption and energy being the outperformers.
  European stocks was slightly up in June and it was closed to 12% rise in the first half of the year. European Parliament approved vaccine passport to ease travel in Europe. Unemployment rate in Eurozone trended down and PMI expanded further. Large cap and Health Care sector led performance during the month.
  The economic figures of China in the first half of the year reflected the recovery was slightly slowing down, coupling with the tightening measures of the Chinese government and the capital chain issues of onshore property developers dragged the market sentiment.
