You should note that the BEA (MPF) Core Accumulation Fund and the BEA (MPF) Age 65 Plus Fund under BEA (MPF) Master Trust Scheme (collectively the "DIS Funds") may not be suitable for you, and there may be a risk mismatch between the DIS Funds and your risk profile (the resulting portfolio risk may be greater than your risk preference). You should seek financial and/or professional advice if you are in doubt as to whether the DIS is suitable for you, and make the investment decision most suitable for you taking into account your circumstances.
- You should note that the implementation of the DIS may have an impact on your MPF investments and accrued benefits. You should consult with the trustee if you have doubts on how you are being affected.
- Investment involves risks. You should consider your own risk tolerance level and financial circumstances before making any investment choices. In your selection of constituent funds, if you are in doubt as to whether a certain constituent fund is suitable for you (including whether it is consistent with your investment objectives), you should seek financial and/or professional advice and choose the constituent fund(s) most suitable for you taking into account your circumstances.
- You should not invest based on this document alone. Investments inherently involve risk and the unit prices of the constituent funds may go down as well as up. Past performance stated in this document is not indicative of future performance. For further details including the product features, fees and charges, and the risk factors involved, please refer to the MPF Scheme Brochure of the BEA (MPF) Master Trust Scheme.

U.S. fundamental data suggests the market is cooling, but remains resilient. Middle East tensions pushed up oil prices and reignited stagflation concerns, weighing broadly on global fixed income as markets repriced the rate outlook. The Federal Reserve left policy rates unchanged in March and signaled that rates are likely to stay higher for longer. Europe's 2026 GDP growth forecasts were revised lower, reflecting weak consumer confidence. Higher energy prices, supply-chain disruptions, and subdued demand dragged the composite PMI down to 50.7 in March. The European Central Bank kept rates unchanged in March. Japan domestic growth remained moderate, with core inflation rising to 1.8% in March. The Bank of Japan ("BOJ") expects higher energy costs to add upside pressure to inflation. The BOJ left the short-term policy rate at 0.75% and maintained an accommodative policy stance. China's first quarter GDP grew 5%, while March Consumer Price Index rose 1% and Purchasing Price Index increased 0.5% year on year, turning positive for the first time in years. With policy support, a manufacturing recovery, and firmer industrial prices gradually becoming more visible, China's deflationary pressure appears to be easing, though stronger domestic demand is still needed. Higher oil prices pushed up inflation expectations, weighing broadly on global fixed income as markets repriced the rate outlook.

In Europe, the Middle East conflict pushed up energy prices, causing markets to reassess economic growth expectations and leading to a sell-off in risk assets. The 2026 GDP growth forecast has been revised down to 0.9%, reflecting weak consumer confidence. Higher energy prices, supply-chain disruptions, and subdued demand dragged the composite Purchasing Managers' Index ("PMI") down to 50.7 in March. The labor market remains stable, with unemployment staying at low levels in February. Core Consumer Price Index rose to 2.3%, and market now expects the European Central Bank ("ECB") to raise rates twice this year. The ECB kept rates unchanged in March and said it stands ready to respond to the evolving Middle East conflict.

U.S. real GDP growth slowed to 0.5% in 4Q25, weighted down by the longest government shutdown on record. The labor market was stronger than expected, with non-farm payrolls beating estimates and the unemployment rate falling to 4.3%, below consensus. The fundamentals data suggests the market is cooling, but remains resilient. The Federal Reserve left policy rates unchanged in March and signaled that rates are likely to stay higher for longer. Escalating tensions between the U.S. and Iran, along with the risk of a disruption in the Strait of Hormuz, have led to heightened short-term market volatility. Soaring oil prices have reignited stagflation concerns. The market saw significant sector rotation, with Energy, Utilities, and Consumer Staples outperformed, while Semiconductors were hit hard.

Commentary 評論

Asian equities ex-Japan has recorded its worst performing month in March since October 2008 on the back of heavy profit taking and de-grossing following U.S. and Israel military attack on Iran. The market pullback was led by South Korea and India. The disruption of the Strait of Hormuz drove oil prices up, sparking fear of possible stagflation. South Korean equities were broadly weak, as rising Middle East tensions, higher oil prices, and macro uncertainty, together with Korea's sensitivity as an energy importer, triggered heavy profit-taking, deleveraging, and rotation into defensive names. Indian equities also posted broad-based declines, led by Financials. As an oil importer, India's macro outlook was pressured by Middle East tensions and higher oil prices. Indian rupee weakness, continued foreign investor outflows, and concerns that inflation could hurt corporate earnings added to the market weakness.

受美國和以色列對伊朗發動軍事攻擊後, 投資者大量獲利回吐和拋售的影響, 亞洲股市 (日本除外) 於3月創2008年10月以來的最大跌幅, 主要由南韓及印度帶動。霍爾木茲海峽的交通中斷推高了油價, 並引發了市場對滯脹的擔憂。受中東局勢緊張、油價上升及宏觀不確定性, 加上南韓作為能源進口國的結構性因素影響, 南韓股市表現疲弱, 市場出現大幅獲利回吐、去槓桿及資金轉向防禦性股份。印度股市亦錄得廣泛跌幅, 金融板塊領跌。作為石油進口國, 中東局勢及油價上升對其宏觀前景構成壓力。同時, 印度盧比走弱、外資持續流出, 以及通脹影響企業盈利的憂慮, 均加劇股市調整。

China's macro backdrop remained stable in 1Q26, with export resilience and a strong trade surplus continuing to offset cyclical weakness in domestic demand. 1Q26 GDP grew 5% year on year, while March Consumer Price Index rose 1% and Purchasing Price Index increased 0.5% year on year, turning positive for the first time in years. With policy support, a manufacturing recovery, and firmer industrial prices gradually becoming more visible, China's deflationary pressure appears to be easing, though stronger domestic demand is still needed for a more balanced recovery.
Hong Kong equities delivered a mixed performance in the first quarter. Although trading activity remained robust, the main indices still fell by about 3% over the quarter, mainly due to weaker risk appetite and sector rotation. Hong Kong's IPO market was a standout, with about HK\$110 billion raised in Q126, ranking first globally by funds raised.
Taiwan equities experienced broad-based sell-off amid Middle East tension, with rotation into defensive sectors such as Telecoms and Consumer Staples. High-beta sectors such as Information Technology and Materials remained among the top performers, supported by still-strong demand for AI infrastructure.

中國第一季度宏觀經濟整體保持穩定, 出口韌性及強勁貿易順差持續對內需周期性壓力。第一季國內生產總值年增5%, 3月消費者物價指數較去年同期上漲1%, 而生產者物價指數較去年同期上漲0.5%, 多年來首次轉正。隨著政策支持、製造業復甦和工業價格走強等因素的逐步顯現, 中國的通脹壓力似乎正在緩解, 但要實現更均衡的復甦, 仍需更強勁的內需支持。
香港股市第一季表現不一。儘管交易活躍, 主要指數當季仍下跌約3%, 主要原因是風險偏好減弱和板塊輪動。香港首次公開招股市場表現突出, 第一季募資約1,100億港元, 以募資額計算位居全球第一。
受中東緊張局勢影響, 台灣股市遭逢全面拋售。資金轉向電訊及消費必需品等防禦性板塊。受惠於人工智能基礎設施的需求依然強勁, 資訊科技與材料等高beta系數板塊表現依然居於領先位置。

Given Japan's high sensitivity to oil supply shocks, export, technology, and financial stocks saw notable corrections. Domestic growth remained moderate, although 2026 GDP forecasts were revised lower due to tariff-related impacts. Core inflation rose to 1.8% in March, but the Bank of Japan ("BOJ") expects higher energy costs to create upward pressure on inflation. The labor market remained tight, with the unemployment rate at 2.6% in February. On monetary policy, the BOJ kept the short-term policy rate unchanged at 0.75% at its March meeting. Despite heightened global market volatility, the BOJ continued to emphasize the "virtuous cycle" between wages and prices and maintained an accommodative stance, while signaling that policy will be adjusted appropriately if inflation sustainably hits the 2% target.

Commentary 評論

Global government bond markets experienced a significant sell-off in March 2026, driven by heightened geopolitical tensions, rising inflation concerns, and sustained fiscal deficits. U.S. Treasury yields rose by around 40-50 bps in March, with the curve flattening after U.S. military action against Iran and the surge in oil prices. The fundamental data suggests the market is cooling, but remains resilient. The Fed left policy rates unchanged in March, in line with expectations. Longer-term inflation expectations and wage growth need to rise further before the Fed would consider hiking again. Sovereign yields in other major markets also rose sharply, with 10-year Bund and Japanese government bonds yields up about 36 bps and 23 bps, respectively, while Gilts sold off the most as the market shifted from pricing in rate cuts to more than 50 bps of hikes. Asian investment-grade bonds remained relatively resilient, though oil-related corporates and sovereigns were more affected. Investors broadly unwound easing expectations across major economies, turning sentiment more cautious.

受地緣政治緊張局勢加劇、通脹擔憂上升以及持續的財政赤字影響，全球政府債券市場在2026年3月遭遇大幅拋售。國債收益率於3月上升約40至50個基點，收益率曲線在美國對伊朗採取軍事行動及油價上升後趨平。基本數據顯示市場正在降溫，但仍具韌性。聯儲局於3月維持政策利率不變，符合預期。長期通脹預期及工資增長需進一步上升，才能促使聯儲局考慮加息。其他主要市場主權債收益率顯著上升，德國及日本10年期國債分別上漲約36及23基點，而英國國債漲幅最大，市場由原本預期減息，轉向加息超過50基點。亞洲投資級別債券表現相對穩健，但石油相關企業和主權債券受到的影響較大。投資者普遍撤回主要經濟體的減息預期，市場情緒轉趨謹慎。

Offshore RMB strengthened against the U.S. dollar in a challenging external environment, appreciating about 1.2% in 1Q26 to around 6.89. The move was driven by Fed rate cuts, broad USD weakness, and stable domestic activity, while the People's Bank of China also managed volatility within the 2% intervention range. HK dollar rates outperformed U.S. rates during the month of March. The Hong Kong Monetary Authority's aggregate balance remained stable at HK\$54 billion. The HK dollar remained in the weak band, reflecting the interest-rate differential and the lack of strong inflows. It is expected that HK dollar rates to remain range-bound and underperform U.S. rates after the recent period of relative strength. It is also expected HK dollar to stay in the weak band.

離岸人民幣匯率在充滿挑戰的外圍環境下走強，第一季兌美元匯率上漲約1.2%，升至6.89水平。這一走勢主要受美聯儲減息、美元普遍走弱以及國內經濟穩定所帶動，而人民幣亦在約2%的波動區間內進行調節以維持匯率穩定。港元掉期利率3月表現優於美元。香港金融管理局總資產餘額維持穩定，為540億港元。受利差影響，且港元流入資金不多，港元匯率仍處於弱區間。港元掉期利率預期在經歷了近期的相對強勁期後，將維持區間波動，表現並遜於美元利率。我們預期港元匯率將維持在弱區間。

U.S. fundamental data suggests the market is cooling, but remains resilient. Middle East tensions pushed up oil prices and reignited stagflation concerns, weighing broadly on global fixed income as markets repriced the rate outlook. The Federal Reserve left policy rates unchanged in March and signaled that rates are likely to stay higher for longer. Europe's 2026 GDP growth forecasts were revised lower, reflecting weak consumer confidence. Higher energy prices, supply-chain disruptions, and subdued demand dragged the composite PMI down to 50.7 in March. The European Central Bank kept rates unchanged in March. Japan domestic growth remained moderate, with core inflation rising to 1.8% in March. The Bank of Japan ("BOJ") expects higher energy costs to add upside pressure to inflation. The BOJ left the short-term policy rate at 0.75% and maintained an accommodative policy stance. China's first quarter GDP grew 5%, while March Consumer Price Index rose 1% and Purchasing Price Index increased 0.5% year on year, turning positive for the first time in years. With policy support, a manufacturing recovery, and firm industrial prices gradually becoming more visible, China's deflationary pressure appears to be easing, though stronger domestic demand is still needed. Higher oil prices pushed up inflation expectations, weighing broadly on global fixed income as markets repriced the rate outlook. 如基金表現少於1年，該基金曆年回報會以推出日至該曆年年底計算。

3 The Fund Expense Ratio ("FER") is up to 31st March, 2025. It is not necessary to show a FER for a constituent fund where the period between the reporting date of the fund fact sheet and the inception date for the fund is less than 2 years.
基金開支比率截至2025年3月31日。如成分基金的基金概覽匯報日與基金的成立日期相隔不足兩年，則無須提供該基金的基金開支比率。

4 The term "cash and others" should be used to denote cash at call, and operating items such as account payables and account receivables (where relevant).
「現金及其他」一詞應指通知現金，及類似應付款項和應收款項的營運項目(如適用)。

5 This constituent fund is denominated in HKD only and not in RMB. Its investment in RMB deposits and RMB debt instruments will be subject to additional currency risks. In particular, RMB is currently not a freely convertible currency and is subject to foreign exchange controls and repatriation restrictions imposed by the Chinese government. Also, its investment in offshore RMB debt securities will be subject to additional market / liquidity risks. There is currently no active secondary market for offshore RMB debt securities and therefore, this constituent fund may need to hold investments until maturity date of such offshore RMB debt securities. In addition, although the issuance of offshore RMB debt securities has increased substantially in recent years, supply still lags the demand for offshore RMB debt securities. As a result, new issues of offshore RMB debt securities are usually oversubscribed and may be priced higher than and / or trade with a lower yield than equivalent onshore RMB debt securities. Currently, most of the offshore RMB debt securities available in the market may not meet the requirements under Schedule 1 to the Mandatory Provident Fund Schemes (General) Regulation and therefore, the offshore RMB debt securities available for investment by this constituent fund may be limited which may result in concentration of credit risk.

此成分基金只以港幣及非以人民幣計值，其於人民幣存款及人民幣債務投資工具的投資，將須承受額外的貨幣風險。尤其是，人民幣目前並非自由可兌換的貨幣，須受制於中國政府所施加的外匯管制及資金調回限制。另外，其於離岸人民幣債務證券的投資將須承受額外市場/流動性風險。目前，由於離岸人民幣債務證券並無活躍的二級市場，此成分基金可能需要持有投資直至到期日。此外，儘管離岸人民幣債務證券的發行近年來已大幅增加，惟離岸人民幣債務證券的供應仍落後於需求。因此，新發行的離岸人民幣債務證券一般出現超額認購，而相比同等的非離岸人民幣債務證券，新發行的離岸人民幣債務證券訂價可能較高及/或以較低收益率買賣。目前，市場上可提供的離岸人民幣債務證券大多數可能不符合《強制性公積金計劃(一般)規例》附表1所載的規定，因此，此成分基金可投資的離岸人民幣債務證券可能有限，或會導致信貸風險集中。

6 Fees and charges of an MPF conservative fund can be deducted from either (i) the assets of such fund or (ii) member's account by way of unit deduction. Before 1st April, 2022, BEA (MPF) Conservative Fund uses method (ii) and, its unit prices and net asset value quoted did not reflect the impact of fees and charges. From 1st April, 2022, the fees and charges deduction method has changed from (ii) to (i) and, therefore, its unit prices and net asset value quoted have reflected the impact of fees and charges for the period starting from 1st April, 2022.

All of the fund performance figures of BEA (MPF) Conservative Fund as set out in the Fund Fact Sheet have been adjusted to reflect the fees and charges. The fund performance figures of BEA (MPF) Conservative Fund in the Fund Fact Sheet are not affected by the change on the fees and charges deduction method from 1st April, 2022. 強積金保守基金的費用及收費可(一)透過扣除資產淨值收取;或(二)透過扣除成員賬戶中的單位收取。於2022年4月1日之前，東亞(強積金)保守基金採用方式(二)收費，所列之基金單位價格及資產淨值並未反映費用及收費的影響。由2022年4月1日起，東亞(強積金)保守基金的收費及費用扣除方法已經由方式(二)更改為方式(一)，故由2022年4月1日起所列之基金單位價格及資產淨值已反映費用及收費的影響。

東亞(強積金)保守基金於基金概覽上所有基金表現數據已作出調整以反映收費及費用在內，因此，基金概覽上的基金表現數據並不受由2022年4月1日起收費及費用扣除方法的轉變影響。

7 Prescribed savings rate is a rate prescribed by the Mandatory Provident Fund Schemes Authority monthly. The prescribed savings rate is the simple average of the interest rates offered by the three note-issuing banks in Hong Kong on Hong Kong dollar savings account with deposit amount of \$120,000.
訂明儲蓄利率指強制性公積金計劃管理局每月定期公佈的利率。該利率是三家香港的發鈔銀行港幣儲蓄戶口12萬元存款的利率水平之平均數。

8 Default Investment Strategy ("DIS") is a ready-made investment arrangement mainly designed for those MPF scheme members who are not interested or do not wish to make an investment choice, and is also available as an investment choice itself, for members who find it suitable for their own circumstances. Members who do not wish to choose an investment option do not have to do so. For those members who do not make an investment choice, their future contributions and accrued benefits transferred from another MPF scheme will be invested in accordance with the DIS.

DIS is not a fund – it is a strategy that uses two constituent funds, i.e. the BEA (MPF) Core Accumulation Fund (the "Core Accumulation Fund") and BEA (MPF) Age 65 Plus Fund (the "Age 65 Plus Fund") to automatically reduce the risk exposure as the member approaches retirement age. Core Accumulation Fund will invest around 60% in higher risk assets (higher risk assets generally means equities or similar investments) whereas the Age 65 Plus Fund will invest around 20% in higher risk assets. Switching of the existing accrued benefits among Core Accumulation Fund and Age 65 Plus Fund will be automatically carried out each year on a member's birthday from the age of 50 to 64 and according to the allocation percentages as shown in the DIS de-risking table.

De-risking mechanism will not apply where the member chooses these constituent funds as standalone investments (rather than as part of the DIS). However, the funds with same name under DIS and non-DIS have the same unit prices.

For further details, including the product features, de-risking mechanism and table, fees and charges, investment rules and procedures, and the risk factors involved, please refer to the MPF Scheme Brochure of the BEA (MPF) Master Trust Scheme.

預設投資策略是一項主要為無意或不希望作出投資選擇的強積金計劃成員而設的現成投資安排。成員若認為預設投資策略適合自身情況，亦可把預設投資策略作為投資選擇。成員如不想作出投資選擇，可無須這樣做。對於沒有作出投資選擇的成員，其未來供款及從其他強積金計劃轉移之累算權益將根據預設投資策略投資。

預設投資策略並非基金，而是一種透過使用2個成分基金，即東亞(強積金)核心累積基金(「核心累積基金」)及東亞(強積金)65歲後基金(「65歲後基金」)，自動在成員逐步達到退休年齡的不同時候降低風險的策略。核心累積基金將其資產淨值中約60%投資於風險較高的投資產品(風險較高的投資產品一般指股票或類似的投資項目)，而65歲後基金則將投資約20%於風險較高的投資產品。核心累積基金及65歲後基金之間的現有累算權益轉換將於成員50歲至64歲期間每年生日當日，根據預設投資策略風險降低表中載明之分配比率自動進行。

風險降低機制並不適用於主動選擇此等成分基金作為獨立投資(而非作為預設投資策略的一部份)的成員。然而，預設投資策略與非預設投資策略的同名基金，其單位價格相同。有關詳情，包括產品特點、風險降低機制及列表、收費、投資規則與程序，及所涉及的風險因素，請參閱東亞(強積金)集成信託計劃的強積金計劃說明書。

9 For the Core Accumulation Fund and Age 65 Plus Fund, a brief explanation should be provided for any material difference between their returns and that of the relevant recognised reference portfolio over any period of 1, 5, 10 years and since launch as constituent funds of the DIS. Material difference means a difference in annualised performance of a constituent fund of the DIS that exceeds 2.0 percentage points either side of the annualised performance of the recognised reference portfolio where the reporting date of the fund fact sheet falls after 30th June, 2019.

就核心累積基金及65歲後基金而言，如基金與相關的獲認可參考投資組合在1年期、5年期、10年期及自推出成為預設投資策略成分基金以來任何一段期間的回報有任何重大差異，須簡述差異理由。就此：如基金概覽的匯報日為2019年6月30日之後，重大差異指某預設投資策略成分基金的年率化表現，高於或低於獲認可參考投資組年年率化表現，而兩者的差距超過2.0個百分點。

10 Due to rounding, the total allocation may not add up to exactly 100%.

由於四捨五入關係，分佈的總數可能不等於100%。
